### **Important Reminders for those who use Facebook, Twitter, or other Social Media Sites for Personal Purposes**

Users who are presently using Facebook to communicate with friends, family and their personal networks, should ensure that their privacy settings are set to "Only Friends." If the "Friends of Friends" or "Networks and Friends" settings are used, users open their content to a much larger group of people, including staff, students, and parents. Any user who publishes content, posts pictures, or maintains dialogue, whether in Facebook, Twitter, a blog, a discussion thread or other website, should never compromise their professionalism, integrity, or ethics. A good question to ask before posting or email a message is, "Would I mind if that information appeared on the front page of the local newspaper?" If the answer is "yes," then do not post it. Contrary to what some people think, email and social networking sites are very public places.
